

Setup Auto Share for Twitter

Auto Share allows you to automatically share the content that you publish on your App to your Twitter account.

From the Dashboard:

1. Select 'Options' in the header.

2. Choose 'Setup Social Auto Share'.

3. Select 'Twitter'.

4. Enter your Twitter username and password.

5. To allow the system to post your content to Twitter, click 'Authorize app'.

6. Check the box if you wish to have your system default to auto share when creating content. Enable default auto share: ☐ Note: You will always have the option to choose not to share a particular item when you publish content.

7. Select Save.

8. Please note that there may be a delay before content is visible on your Twitter page.
