

Block Messages

If you receive prank or abusive messages you have the ability to block the messages sent from that particular device. Blocked users will still be able to use your App but are unable to send messages.

From the Dashboard:

1. Select 'Messages' in the header.

2. Check the box next to the sender's message that you wish to block.

<input type="checkbox"/> Select All	Subject	Message
<input type="checkbox"/> ←	send	sending picture

3. Select 'Block Sender' at the bottom of the screen.

Block Sender

4. Click 'OK'.

OK

5. The sender will now be blocked from sending messages unless you unblock them.
