

## Setup Auto Share for Facebook

Auto Share allows you to automatically share the content that you publish on your App to your Facebook account.

From the Dashboard:

1. Select 'Options' in the header.

2. Choose 'Setup Social Auto Share'.

3. Select 'Facebook'.
4. Enter your Facebook username and password.

### Facebook Login

Email or Phone:

Password:

5. Click 'Login'.

6. You will be asked some questions giving the system permission to share your content to Facebook. Click 'Okay'.
7. Check the box if you wish to have your system default to auto share when creating content. Enable default auto share: ☐ Note: You will always have the option to choose not to share a particular item when you publish content.

8. Check the box by each Facebook page to which you wish to auto share content.

Select facebook pages for auto publish: → ☒ Your Timeline ☒ Fan Page

9. Click 'Save'.

10. Please note that there may be a delay before content is visible on your Facebook page.
