

A New **Mobile App Technology** Allows You To...

**Automate What Professional Mobile App
Programmers Charge Thousands for... and Be
Up and Running in a Matter of Days!**

Here's The Difference That Makes This Solution So Much More Effective
Than Anything Else You've Ever Seen:

**We Have Conquered the Three Biggest Impediments
to Mobile App Adoption!**

Mobile devices are now the preferred tools for accessing information on the Internet but here are the three things that have prevented businesses from having a truly effective mobile app ... even if they knew they needed one.

- **Cost** - A custom mobile app can cost \$10K-\$80K ... *or more!*
- **Time** - Programming can take 2-10 months ... *or longer!*
- **Management and Maintenance** - Highly skilled staff or subcontractors are expensive!

These three impediments have locked many businesses out from having a mobile app. Now we have changed that.

Discover How You Can **Get a Customizable,
Branded Mobile App Faster and Easier** Than You
Ever Thought Possible

No Experience Necessary

No Special Skills Required

No Hidden Costs

Would you be surprised to learn that there is a way to get a customizable, branded mobile app that includes instant two-way communication capabilities and which is:

- Ready for submission to all three mobile app platforms - Apple, Android *and* Windows - in four business days ... *or fewer?*
- Available for less than \$1,700 per year with a one-time set up fee of \$750?
- Simple to manage and ready for content created by anyone with average computer skills?

**The secret formula for your mobile app success,
using nothing more than computer skills you
already have is our**

Revolutionary TwoVie Mobile App Platform!

Until now, if you wanted a mobile app you would have to hire a web developer and go through a lengthy, costly, time-consuming and frustrating process. In most cases there would be no guarantee the end-product would actually be something that could produce the results that you hoped to achieve. In other words, it was a big gamble.

If you are like us, you can't afford to gamble with your money. You need a proven way to make your investments yield results the first time and every time. You also know that without a mobile app, **you are in danger of losing clients to competitors who are able to get in front of your clients** in the one place ***where they are now getting the majority of their information - on their Internet-connected mobile devices***. How are they doing this? With mobile apps!

Stop Reinventing the Wheel! That's What We Did.

When you think about it, building custom mobile apps is a lot like reinventing the wheel. Eventually everybody ends up with a wheel. The only difference is the path they take to get that wheel, the time it takes, how much it costs and what the finished product looks like. We used to do the same thing for clients and we decided that there had to be a better way, a

more cost-effective and timely way to do this. So we analyzed every aspect of mobile app development, broke it down into its essential components and came to a startling conclusion. ***We were going about this all wrong!***

We decided that if we were going to make it possible for businesses to have their own mobile app, we had to:

- **Remove the complexities** from the app development process
- **Make mobile apps affordable** for the end users
- **Make it easy to customize** the mobile app
- **Make it simple to create and manage content** on the app
- **Reduce the time** it takes to deliver the app to the app stores for approval and publication
- **Make the app available on** all three platforms - **Apple, Android and Windows**

As if that wasn't enough, **we decided to add one very important feature** that most apps don't have - **virtual instant two-way communication between you and the app users!**

After more than two years of research, development, testing and refinement, we are pleased to announce that we have the solution to all of these obstacles to mobile app adoption.

In Just 3 Minutes From Now You Could Be Taking A Giant Leap Towards Having Your Own Branded, Customizable Mobile App!

Before we tell you how to do that, we want to tell you **how we made this possible**. Simply stated, we started with a blank canvas and no limitations on the design process. What evolved was an engine that could power a **delivery platform for mobile apps**. By creating a platform, we eliminated all of the things that make mobile app development so costly and time consuming.

Introducing TwoVie - *THE* mobile app solution!

TwoVie is a mobile app platform that **delivers results in record time** as a hosted service. It is extremely versatile in the ways it can be configured and used. We have specific versions available for law enforcement, schools and youth groups in addition to our flagship TwoVie Hub, which is completely adaptable to a wide variety of use cases.

We are convinced that you will see a return on investment (ROI) almost immediately when you start using TwoVie. More importantly, you will also **get a different kind of ROI - Return on Innovation!** By adopting a mobile app strategy you can stay ahead of the competition, stay connected with your clients and make it easier for people to do business with you.

The extensive feature set is too large to adequately describe here, but you can check it out at www.twovie.com. However, we have a better idea.

Try it and *Then* Buy it!

We don't expect you to take our word that this is the easiest, quickest most cost-effective way to get a customizable, branded mobile app for your business.
