

Add Private Button Module

You may add an additional content module and **an App button that is private**. Only app users who have accepted on their smart device an email invitation sent by you will be able to see the button and its contents on that particular smart device. You have full control of what displays, as well as the ability to disable the button on individual smart devices at any time.

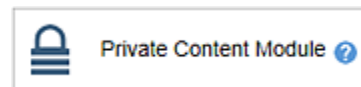

From the Dashboard:

1. Go to the Market Place on the right.

Market Place

2. Select 'Private Content Module'.

3. The billable amount will display. Click 'Continue'.

Continue >>

4. This will take you through payment processing where you may complete your order.

5. On the payment Thank You screen

Thank You

click the 'Dashboard'

button.

Dashboard

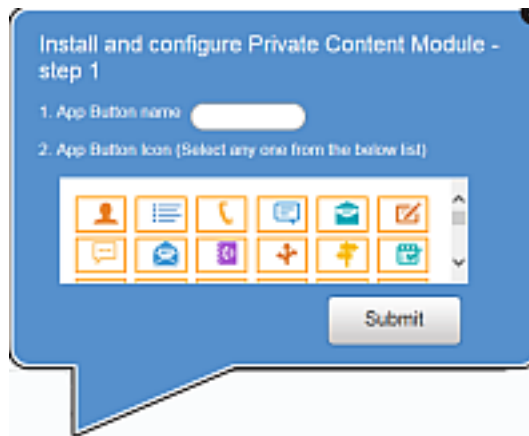

6. Click the blinking 'Install' button on the Install Private Content

Install Private Content
Module

Install

Module under Downloads on the right.

7. In the pop up window name your new private module (maximum 13 characters) and choose a button icon that will display on your App and Dashboard.

Install and configure Private Content Module - step 1

1. App Button name

2. App Button icon (Select any one from the below list)

Submit

8. Click 'Submit', then 'Close' when the installation has been completed.
9. Your new module is now ready to use.
