

Add Private Call Directory Module

You may add a call directory module with **an App button that is private**. Only app users who have received and accepted on their smart device an email invitation sent by you will be able to display the call directory button and its contents on that specific smart device. You have full control of what displays, as well as the ability to disable or delete the button on individual smart devices at any time.

From the Dashboard:

1. Go to the Market Place on the right. 
2. Select 'Private Call Module'. 
3. The billable amount will display. Click 'Continue'. 
4. This will take you through payment processing where you may complete your order.
5. On the payment Thank You screen  click the 'Dashboard' button. 
6. Click the blinking 'Install' button on the Install Private Call Module  under Downloads on the right.
7. In the pop up window name your new private module (maximum 13 characters) and choose a button icon that will display on the App and your Dashboard.

Install and configure Private Call Module - step 1

1. App Button name

2. App Button Icon (Select any one from the below list)

Submit

8. Click 'Submit', then 'Close' when the installation has been completed.
9. Your new module is now ready to use.
