

Message Blocking

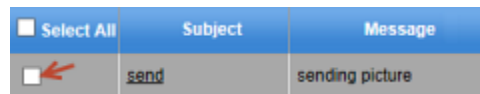

If you receive prank or abusive messages you have the ability to block messages from that particular device. Blocked users will still be able to use your app but are unable to send messages.

From the Dashboard or Menu:

1. Select 'Messages'.

2. Check the box next to the sender's message that you wish to block.

3. Select 'Block Sender' at the bottom of the screen.

4. Click 'OK'.

5. The sender will now be blocked from sending messages unless you unblock them.
