## Disable Mobile App Listing

Note: The box for the mobile app listing is enabled by default. If checked, your App will be listed in the Hub's Master App. This will not affect any branded app's listing in the App Stores.

To disable this listing:

From the Dashboard:

1. Select 'Options' in the header.

2. Choose 'App Display Settings'.
3. Uncheck the 'Enable Mobile App Listing' box at the top of the screen.

4. Click 'Update'.
