Install Desktop Notifications Manager

Install the Notifications Manager on your desktop to receive notifications of new messages and tips from your mobile app users without logging into your system. When a message comes in an alert will sound and a pop up will appear on your desktop indicating how many messages are present.
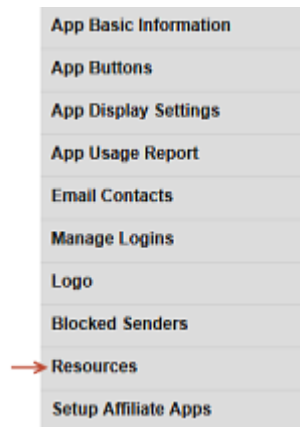

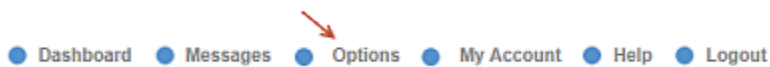

From the Dashboard:

1. Click the 'Downloads' button under Marketplace on the right.

Or

2. Select 'Options' in the header.

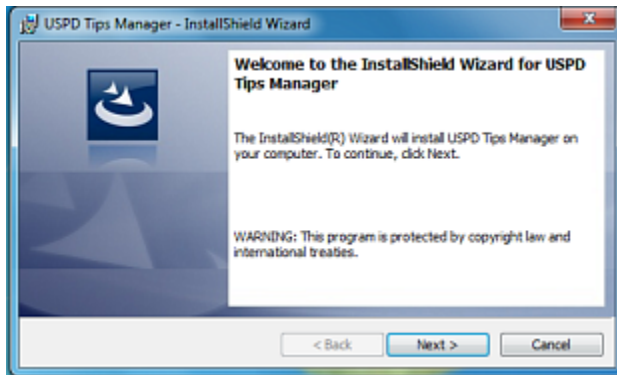

3. Choose 'Resources'.

4. Go to Notifications Manager and click 'Download'.

5. Click the arrow next to save at the bottom of the screen and choose 'Save & Run'.

6. The install wizard will appear; click 'Next'.

7. Wait while the Installer prepares the install; then select 'Install' when the

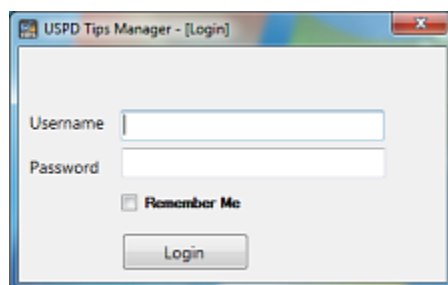

window indicates it is ready.

8. When completed click 'Finish'.

9. A Notifications icon for your particular Hub product that looks similar to these

 will now appear on your desktop.

10. Double click the icon and enter your username and password.

Note: Check the 'Remember Me' box if you would like to store your information.

11. When the icon is clicked your messages and tips will display.
